Subject: Antenna Rotor Wanted (5 sq. Ft)
To: ham-equip@ucsd.edu

I am looking for someone who has an antenna rotor that they want to sell,
it needs to have a windload of at least 5 sq. feet, dosen't need any
special features, just a dial for direction, i will be using it on a
Moonraker 4 beam. If anyone has one to sell, send me some E-Mail, i will
consider all offers. Thanks

Jason

To: ham-equip@ucsd.edu

I have recently come into a piece of equipment (I bought it at auction), and I dont know what it is exactly, I bought it in a job lot marked as box of radios.

The set is obviously a mobile (car) transceiver, the only name on it is SMC 2520. It has a large LCD display on the front, and a 4 x 4 button matrix on the right side of the front.

On the back is a plate marked SMC 2520, VHF BAND 3 TRANSCEIVER. This unit meets MPT 1323 and complies with MPT 1327 and MPT 1343. Manufactured in the UK.

It also has a standard PL259 socket on the back for an antenna.

What I need to know is what freequencies does this radio operate on (or band - ? frequency of band 3), and who if not ham's would use such a radio.

All answers can be e-mailed to me, unless the answer is of any interest to this group.

Thanks in advance.

I don't think, therefore I am not, or am I.
A bird in the hand, deserves a poke in the bush.

Kenwood TS520 HF transceiver for sale. Nice cosmetically, 100+ watts output, solid state with 6146B transmitting tubes, has CW and SSB filters installed (TRIO). Operates USB/LSB/CW on 10, 15, 20, 40, 75/80 meters. Will operate mobile or base (has DC connector and AC connector). Comes with hand mike,

and manual, too. In good operating condition. Please make me an offer. Will go to best offer this week. email to: lairdpg@lub001.lamar.edu if interested.

Bart:

Here is the address: Wm. M. Nye Co. Inc. as of 6/92
12031 Northup Way #101
Bellevue, WA 98005

I sent my MB-V-A in for service once and they did a good job for me. \$57 out of warranty charge plus \$8 freight. However, the problem has come back and I'm not using the tuner now. Problem is with switch contacts sticking open. I think I can fix this myself now that I know what is wrong.

Should you need me to copy the manual, I can do that; its only a few pages.

Subject: MARS/CAP mod for Icom Delta-1A?
To: ham-equip@ucsd.edu

Does anyone have the MARS/CAP mod for the Icom Delta-1A? I saw a mod that will open the heck out of it, but I don't want to do that. I just want to be able to transmit all the way down to 420MHz. I'm a control op on two different intertie systems and it would be handy to be able to come in through our link frequencies. So, MARS/CAP info is what I need.

Help, please!

Hello -

well, I know this rig is fairly new, but does anybody have heard of any mods ?
I've looked in oak.oakland but I found none.

Thanks !
